### **Detailed Action**

#### ***Response to Amendment***

Claims 1-10 are pending. This action is in response to the amendment received April 1, 2005.

#### ***Response to Arguments***

Applicant's arguments filed April 1, 2005 have been fully considered but they are not persuasive.

In response to the arguments concerning the previously rejected claims the following comments are made:

Applicant alleges that the prior art made of record fails to teach a function performance detecting step for detecting that a predetermined function of an application program. The examiner disagrees with applicant's representative since Ahmad teaches a function performance detecting step for detecting that a predetermined function of an application program (col. 1, lines 60-65; col. 2, lines 63-65; col. 11, lines 1-22; figs. 1-2). In other words, Ahmad teaches a module program corresponding to a function as claimed in the pending application 09/779,497. In programming, a module is a collection of routine and data structures that performs a particular task or implements a particular abstract data type. Modules usually consist of two parts: an interface, which lists the constants, data types, variables, and routines that can be accessed by other modules or routines; and implementation, which is private (accessible only to the module) and which contains the source code that actually implements the routines in

the module. On the other hand, module in hardware is a self-contained component that can provide a complete function to a system and can be interchanged with other modules that provide similar function. Therefore in figure 1 (element 37), Ahmad discloses a module in relation to hardware in detecting systems.

With regards to the claims rejected as anticipated over Ahmad, the examiner would like to point out that the primary reference teaches the claimed limitations and thus provides adequate support for the claimed limitations. Therefore, the examiner maintains that Ahmad anticipated the claimed limitations.

### **Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
